

**SMC Solenoid Valve (Part #: TR-2210)
For TOUGH GUN™ Reamers
With Externally Mounted Valves**

You may have expected a slightly different solenoid valve than what was found in this bag. Normally, the TR-2210 solenoid valve (made by SMC) is the type found in figure 1a. Now, we are pleased to offer an improved DIN connection for this product (figure 1b).

- The NEW product is rated “IP65” (as defined in international standard IEC 60529)ⁱ, where:
 - 6 = Dust tight; no ingress of dust; complete protection against contact
 - 5 = Protected against water jets; i.e. water projected by a nozzle against enclosure from any direction shall have no harmful effects

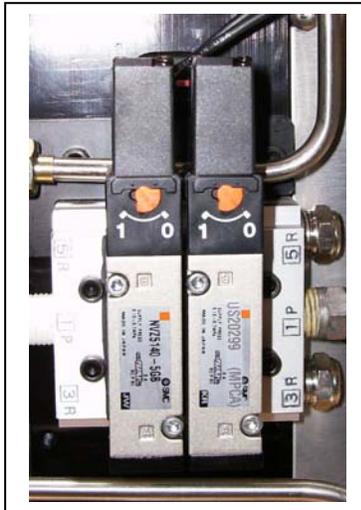

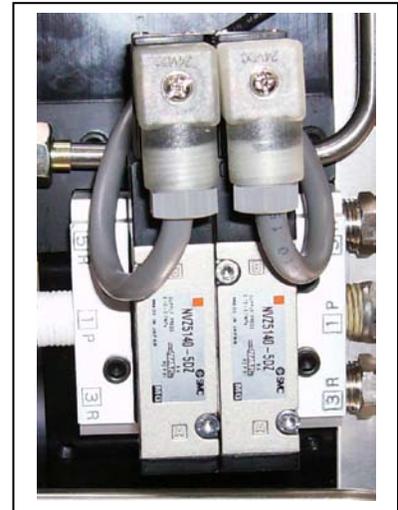

Figure 1 – The previous Reamer Solenoid Valve is shown in figure 1a (to the left) and the NEW Reamer Solenoid Valve (also SMC brand) is shown in figure 1b (to the right). The NEW product is rated IP65 for improved protection from harmful welding environments.

NOTE: this product is designed for use on TOUGH GUN Reamers with externally mounted valves.

We believe this product will enhance the overall performance and reliability of your TOUGH GUN Reamer. Please notify us if you have any concerns about this product improvement.

ⁱ IP = International Protection Rating (aka Ingress Protection Rating); Source of information: 1) IEC 60529: Degrees of protection provided by enclosures (IP Code). International Electrotechnical Commission, Geneva; 2) IEC 60529 (ed2.1), clause 4.1
