

Universal Power Pin Kits

MIG Welding Accessory

Issued June 2023 • SPEC PPK-2.1

The Right Tool for the Job.

Extremely durable and easy to maintain, our power pins let you connect our MIG guns to most any feeder or machine on the market.

Interchangeable power pins connect to wire feeders and machines from major manufacturers.

Ease of maintenance and reduced downtime - power pins can be changed without removing the straight rear strain relief. Trigger cable adaptors also remain in place during changeout which makes cutting and splicing the trigger wires unnecessary.

Compatible with BTB (Best of the Best) MIG Guns and former T-Gun™ Series MIG Guns.

If your feeder does not appear in this spec sheet, please refer to our Quick Connect Blocks & Adaptors Spec Sheet for additional connection options or contact the Bernard Customer Service Team at 1-855-MIGWELD (644-9353).
